Festival of Song and Music Opens Quarter of Century as Oddfellows

Tenth Annual Musical Festival Opened To-Day in Columbus Hall

Nearly 650 Individuals Will Take Part and School Choruses Will Add Interest

This morning the musical festival was opened at Blairmore with the largest number of entries in the ten years records. Coleman is well represented by the high school orchestra under Miss May Powell; public school choruses under Mr. Moffatt, and the high school will compete on Friday evening with Miss Powell conducting. Coleman string quartet on Thursday evening includes W. J. Harris, F. G. Harris, Tom Hill and M. Pliard. Many individual soloists in all classes from Coleman are entered.

The evening sessions are always attended by capacity houses, and the highlights of the concluding performance are Crow's Nest Pass Symphony Orchestra with W. H. Moser conducting; Cranbrook Symphony Orchestra, Wm. Raven conducting; Crow's Nest Pass Choral Society, T. S. Baynon conducting; F. J. Smith Memorial Cup Competition, in which Lena Fraser of Blairmore, Isabel Dicken of Fernie and A. B. McMurdo of Pincher Creek will compete; senior violin competition and Choral societies. Kimberley Brass Band, H. C. Pearson conducting, will play on Friday evening.

OPENING ADDRESS

The opening address by the president, H. T. Halliwell, was in part as follows:

"In opening the tenth annual Crow's Nest Pass musical festival, it is of interest to make brief comparison with ten years ago and today to indicate its development. Inaugurated by a minister of the gospel, Rev. W. T. ('Bill') Young, now of Edmonton. It has grown from what was originally a Sunday school festival till it embraces a wide territory and entries at this festival are recorded from points east to Medicine Hat and west to Cranbrook and Kimberley. School choruses, symphony or choruses, church choirs, choral societies, high and public schools, individual soloists and instrumentalists, to the total number of nearly 650 people will take part in the next three days program."

It can be regarded as a permanent institution in the Pass towns, and has filled the praiseworthy purpose of inculcating a higher appreciation of vocal and instrumental music among young and old. Encouragement has been given this year by the associated school boards in engaging an instructor on full time duty to give regular lessons in all schools, with the result that school choruses will be an interesting added feature of this festival. Appreciation must be expressed of the voluntary assistance of the various committees in the Pass towns, and to all who by their active interest and participation contribute towards the success of the festival."

PRESENTATION OF CUPS

Mr. L. L. Morgan, for many years president or the festival committee, and immediate past president, will present the cups, shields and trophies on Saturday evening.

READ CAREFULLY THE GROCERY SPECIALS—YOU'LL SAVE

FEW, very few it is true, overlook the fact that there is a local newspaper until they want a free write-up. To such we would remind them it is good business to advertise in The Journal, which is the paper looked for and read by Coleman people and those who live further afield and who are still interested in Coleman. Set the example of being loyal to your own community, for usually you receive the same treatment as you mete out to others.

Wrestling Program Concluded With Near Free-For-All

Jack Lochrie Was Aspirant for Match Against Chief Littlewolf, But Mounted Police Stopped the "Slaughter"

The wrestling matches on Monday evening were the source of considerable comedy, especially when Jack Lochrie, who apparently has been hiding his light under a bushel, jumped into the ring at the close of the main bout and wanted to wrestle Chief Littlewolf, who had been given a decision over Jack King with a flying wrist lock.

These two gave a good exhibition of wrestling, which called forth cheers from one faction and groans and hooting from another, but apparently everyone went away with a smile, whether it was of satisfaction or otherwise they themselves were the judges.

Jack Kogut and Hynie Olson opened the program, and Kogut appeared to have the best of the ring work throughout, winning the match with a reversed wristlock. The attendance was improved over the first match, and some of the audience were worked up to almost a frenzied pitch, the impartial observer almost expecting them to get into the ring themselves and give an exhibition.

Climax came at the finish when the aforementioned Jack Lochrie threw off his coat and vest, to square up to Chief Littlewolf, who is about twice the weight of Lochrie. Then Jack King started into Littlewolf; the referee joined in, and just as things were getting mixed up with four men in the ring, with Promoter Barringham trying to restore order, Sergeant Gwney representing the long arm of the law made the fifth man in the ring and called a halt to what might have developed into a free-for-all.

Social Credit Floored Him

Nels Engstrom will come up for trial October 31 on a charge of attempted suicide. Evidence indicated that he had attempted to hang himself in the shaft of a coal mine, following an argument on the subject of Social Credit. Engstrom is a respected character 70 years of age, and the episode was productive of much sympathy. "Too old to fight, and unable to hold up my end of the argument," was the way the disappointed old gentleman explained his position. —Hanna Herald

Bannan Wins Case Against Blairmore Mayor and Council

Chief Justice Scathingly Criticizes Action of Mayor Bill Knight—Must Not Endanger Life and Property of Citizens—Town Must Pay \$100 to Bannan Restore Current Immediately and Pay All Costs of Lawsuit Amounting to Between \$500 and \$600

Samuel G. Bannan of Blairmore, more in no uncertain terms and together with his wife, brought successful action against the Town of Blairmore for depriving him of electric current for some months. The trial took place in Lethbridge before Chief Justice Simmons on Tuesday and judgment was recovered by Mr. Bannan for \$100.00 and an order to restore his electric current within 24 hours together with all costs.

During the trial the chief justice had occasion to criticize the actions of the mayor and council of Blairmore.

Nurse's Tragic Death

Tragic death befell a third year student nurse, Miss Stevens, at University hospital, Edmonton. Hurrying after coming off duty at 2 o'clock in the afternoon to meet a gentleman friend she had not seen for some years, who was waiting for her in the building, she was found on the floor of the bathroom unconscious, and despite all efforts by doctors and an operation for cerebral hemorrhage, she died on the operating table. She was one of the best nurses in the hospital, gaining high marks in all her exams.

Rumors of Provincial Election Candidates Begin to Rumble in Pass

Every Shade of Political Opinion Will Probably Have Opportunity to Air Views

Liberal, Social Credit and Communist supporters it is reported will have candidates in the field for Rocky Mountain constituency in the next provincial election. Straight Labor, Independents and Conservatives have yet to be heard from. If all run, it would appear that the successful candidate, no matter to which party he belonged, would represent only a minority of the electors, as votes would be split between rival candidates. In the provincial election of 1930 George Cruickshank, the present member, polled 1604, Joe Stobbs 820 and Rock Sudworth 787. Rumor has it that A. M. Morrison is to be Liberal candidate, though he made no open avowal of such intention; Murphy the Communist candidate, while a Bellevue man is mentioned as Social Credit candidate. It is probable that the miners not allied with the Communist organization will nominate a candidate, as they did in 1930, Joe Stobbs being their candidate.

The radio set for which tickets are being sold is on view in Rush ton's store. Tickets are 25c, proceeds in aid of St. Alban's church parish hall.

Too many wait for the cherries that drop from the tree instead of doing some of the picking.

COMING EVENTS AT THE COMMUNITY HALL

Friday, Oct. 26—Hockey Club Dance. Friday, Nov. 9—K. of P. Dance. Christmas Eve—K. of P. Dance. Christmas Night—Ken Blain dance. New Year's Eve—K. of P. Dance. New Year Night, Jan. 1—K. Blain. Note—Bookings for the Community Hall may be made at The Journal Phone 209 H. T. Halliwell, secretary of Community Hall Committee.

CATHOLIC BAZAAR

Catholic Ladies Aid Tombola, and dance on Monday, Nov. 5 in Italian hall. See advt.

Basketballers Organize

The basketball meeting held at the Journal office last Friday evening was well attended and the following officers elected: President, Ruth Morrison; vice president, John McDonald; secretary, Mrs. Mary J. Halliwell. Another meeting was held at Morrison's garage on Sunday and it was decided that practices would start as soon as the Community hall is available. Mr. Arthur Graham and John McDonald were appointed coaches of the girls' teams, and Mr. Hall will be in charge of the boys' team. A dance will be held during Christmas week to help raise funds for the basketball association.

Oddfellows and Rebekahs Will Honor "Long Service" Members

25 Years Membership Will be Rewarded by Presentation of Jewels

Members to be honored this evening by Coleman Lodge I. O. O. F. are J. H. Boulton, McKee Hunter, Harry W. Clark and John Hatfield, the latter, though for many years a resident here, now living in Nova Scotia.

Doubtless these gentlemen will each have many interesting reminiscences to review during their quarter century of membership, and as all are well known and have at various times taken active part in local affairs, The Journal hopes to give some of their impressions in future editions of the Journal. They should prove interesting to older residents as well as the younger people, therefore it is hoped these gentlemen will sharpen these memories and their pen and tell the people something of interest of their past 25 years.

The ladies to be similarly honored are Mrs. C. F. Dunlop and Mrs. J. L. Lonsbury, whose fifteen years of membership will be recognized by presentation of jewels.

"Fresh from the Gardens"

The "Toll Of The Road"

When is a halt to be called to the ever mounting toll of deaths and serious injuries attributable to automobile accidents.

It is well nigh impossible to pick up a newspaper these days without finding a tragic headline recording one more, or several more, fatalities and to learn that some promising life has been snuffed out or the community has lost the services of some of its outstanding citizens.

If the total of killed and injured in automobile crashes of one kind or another, and from one cause or another, in all countries throughout the world could possibly be ascertained each and every day, and then made public daily, it would perhaps shock the consciousness of most people. The opinion may be ventured that many a war has been fought in which the average daily casualties were not as great as to-day's average "toll of the road".

If the same number of men, women and children were being killed and injured each day and every day in a war being waged on the North American continent, our newspapers, press societies, churches, governments, would begin to demand that a stop be put to the carnage.

But because the slaughter and suffering is merely the result of automobile accidents, people shrug their shoulders, give expression to some polite words of sympathy, wonder why there should be so many accidents, and then pass on to discuss the price of wheat, the result of the international yacht race, or the outcome of the world's baseball series.

Governments and communities the world over have improved and continue to improve roads and main highways. Hundreds of millions of the taxpayers' money is being spent annually in so doing, while the maintenance of these higher standard highways costs tens of millions more. And the better the roads, the more automobiles.

Automobile manufacturers continue to take advantage of these better highways to turn out more powerful and even faster cars. They equip them with better brakes, better tires, safety glass, better devices of every conceivable kind, and then they are turned loose on the highways.

Volumes of laws and regulations are passed to control the operation of these cars and traffic regulations of many kinds are approved and ordered to be enforced. Some of them are, many are not. In fact, without a traffic officer posted every few miles and on every road, complete enforcement of the many laws and regulations is physically and practically impossible. People know this and proceed to ignore laws and regulations enacted for the protection of themselves as well as other people.

Glaring headlines which blind the driver of an oncoming car; only one headlight burning; no rear light; overtaking and passing and then cutting in ahead of another car and doing so at high rate of speed; tearing up an incline in entire ignorance of the fact that another car may be mounting the other side; dashing in from a side road on to a main highway without stopping or slackening speed; operating cars with defective brakes, but why continue the enumeration? These and many other violations of law and regulations are daily sending people to their deaths or to live on, helpless, suffering cripples.

When is it going to stop? How is it going to be stopped? Or have people become so reckless and so callous of death and suffering, and so careless of the rights of others, that they are quite satisfied that the "toll of the road" should go on mounting higher and higher?

The passing of even more stringent laws will not stop it, although they might prove, for a time at least, a greater preventive. The better enforcement of existing laws and regulations would help, especially if the penalties for violation of them were made much more severe. More and still more education of the people would ultimately bring some results.

But in the final analysis there is only one way in which this black blot on our present day civilization can be removed. The individual citizen must himself do it. Education, laws, law enforcement will never accomplish it. It is that strong, almost all-powerful Human Factor, which so many people to-day are inclined to ignore in the realms of society, economics and in relation to all public policies and acts which constitutes the weak link in the chain of public conduct and public responsibilities.

Individuals must take this great problem in hand. They must not only understand and obey the law themselves, but whether they like to do so or not they must individually become guardians of the public weal and take an active part in solving the problem, rather than maintain a merely academic interest in it, saying, "Let George do it," and relying on law and policemen to do what law and policemen alone can never do.

Would Be Interesting

Print Shop of William Lyon Mackenzie May Become Museum

If it should prove possible to restore William Lyon Mackenzie's old print-shop at Queenston, Ontario, and to furnish it, as it is suggested, with the type of equipment used in publishing the first issues of the Colonial Advocate, the building might very well become a museum for the display of early printed matter and early specimens of the printer's art in that part of the Dominion and thus lead to considerable notice on the part of visitors. Mackenzie was one of the first newspaper editors to fight and suffer for the freedom of the press in Canada, a principle now universally acknowledged, and his efforts in that behalf are entitled to greater recognition than that which is generally accorded them.

Four new telephone exchanges are opened in England and Wales every month.

Looseness Of the Bowels During the Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.

Do not check the discharges too suddenly. Do not experiment with a new and untried remedy, but take Dr. Fowler's Extract of Wild Strawberry, a remedy that has been used by thousands of families during the past 88 years.

Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.

Planet Yields X-Rays

University Of California Believes New Source Of Radiation Found

X-rays from mercury, an entirely new source of such radiation, are announced from the University of California. The discovery that mercury will produce X-rays was the outgrowth of a new type of high power vacuum tube with voltages not hitherto available to science. The process was described in the physical review by Wesley M. Coates and David H. Sloan of the University's radiation laboratory, department of physics. The rays cover a wide variety, from "soft", that is with small penetrating power, to "hard" rays that drive deeply into solid substances. The "targets" upon which the mercury beams were smashed include aluminum, sulphur, bromine, molybdenum, silver, tin and lead.

Greece has ruled that aeroplanes cannot be taken into the country without a permit.

Only One Drawback

Johannesburg People Do Not Like Cattle Roaming On Streets

Johannesburg, it is almost superfluous to remark, is a very progressive city. We know this for ourselves and even if we didn't, there are plenty of tactful and discerning visitors who come here and tell us so. So rapid, in fact, is our advance, that Professor Coulter, of the U.S.A. was made to feel like Rip Van Winkle on revisiting us after only five years' absence. We have, he tells us, "an integrated communal machine, a group co-operating various agencies, a long-time plan, a city socially conscious, dynamically interested, with a clear-cut purpose." He might have added that we also have a system which permits horned cattle to run loose in the principal streets. Very few modern cities can say the same. —Johannesburg Times.

INDIGESTION?

Then Try KRUSCHEN at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach or a miserable feeling after meals there's nothing but Kruschen for relief. The little daily dose of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unfailing elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen Salts now entirely free of charge. Ask your druggist for the Kruschen Giant Package. This is the Regular bottle, together with a special FREE Trial Bottle. Use the Trial bottle first. Then if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and he will refund it, full value. But act quickly or your Free Trial Bottle will be gone. Your druggist has only a limited supply.

Snake On Hunger Strike

Prize Bushmaster In Bronx Zoo Refused To Eat

When Dr. Raymond L. Ditmars, curator of mammals and reptiles at the Bronx Zoo, New York, returned from Trinidad with a living specimen of the bushmaster, deadly tropical snake he had hunted for a quarter of a century he intimated the struggle was over.

But the bushmaster is slowly going the way of his three bushmaster predecessors in the last 35 years at the zoo. He won't eat, he hasn't taken a morsel since he was caught. The freshly killed rats which Dr. Ditmars hopelessly tossed into him every two or three days are spurned. So is every other choice bit-bite on the menu for bushmasters.

Woman Dispatches Planes

Looks After Passengers And Mail In All Weather

The aeroplane dispatcher at Concord, New Hampshire, airport is a woman, Mrs. Alice L. Marston. Four times daily a tri-motored passenger, mail or express aeroplane soars there, and whether it be at low level, as it was once last winter, or 90 in the shade, as it was more than once this summer, passengers are greeted by a trim, diminutive lady who smilingly takes their tickets, assists them to alight and then tosses the mail bags on board or takes them off.

"Blue" Spells

Reduce some women to the painful shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It soothes quivering nerves... helps to tone up the general health... gives them more pep... more charm.

Africa's Victoria falls are more than twice as high as Niagara.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Interest is increasing in these articles on Character from Handwriting. Many readers are taking advantage of the author's offer to give them a personal reading of their own writing. If you want your handwriting analyzed, read the announcement at the foot of this article.)

I mention a "patient" earlier article that a handwriting expert—a Grapho-Analyst—is not a magician. He is not one who, by waving a magic wand, can transfigure you. He cannot, by the mere expression of certain weaknesses in your character, change those weaknesses into strong chains of character.

A Grapho-Analyst's position is that of an adviser. He can dissect your character and your talents; he can probe your nature and put his finger on the weak points, and he can delineate the good traits that you have.

It is up to the "patient" whether or not he acts on the suggestions of the Grapho-Analyst. If you go to a doctor, he makes certain suggestions for treatment, based on his diagnosis of your case, it is up to you whether you follow out his advice.

So with the Grapho-Analyst. This science of reading character from handwriting will be of tremendous help to you, and will, if you follow out the advice that is given you, based on your handwriting, be of incalculable value to you.

Various correspondents have asked certain questions. Some of them have already been mentioned in my previous articles, but it will be well worth while to repeat one or two of them. Because in any consideration of the value of Grapho-Analyst, that fact must be borne in mind.

Can handwriting tell sex? No, it cannot. We all know of women who have very strong qualities and virile personalities—who act like men are commonly supposed to act. And these women write like men. This is because there are certain definite masculine qualities—aggressiveness, for example. This shows in the writing.

And some men are very effeminate. They write like many women. And these characteristics show up in their writing. But it is not possible to lay it down as a basic law, that so can be shown from handwriting. It is possible to diagnose ailments and disease from handwriting? There are certain diseases, as heart trouble, for instance, which can be diagnosed from handwriting. But this angle of Grapho-Analyst is hardly in the early experimental stages.

Nothing definite or scientific can be said in this matter, at the present time, and, for that reason, Grapho-Analyst does not attempt to inform questioners as to their specific ailments.

Grapho-Analyst is a scientific delineation of character and talents from handwriting, and as such, is of tremendous value to you. It is definite, and unassailable. On these points, and in that regard can exert a tremendous power for good.

Do you want to know the traits of character that your handwriting reveals? A personal analysis may be the means of saving you much trouble in the future. And do you wish to know the secret characteristics of your friends? Send specimens of their writing. I will send you a complete analysis you want analysed, and enclose 10c coin for each. Send with 3c stamps addressed to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Street, Winnipeg. Letters are confidential and will be answered as soon as possible, but please allow about two weeks for your reply.

Will Take Referendum

To Test Great Britain's Traditional Policy Of Splendid Isolation

"Great Britain will for or against her traditional policy of splendid isolation" shortly will be tested by a thorough referendum conducted by the League of Nations union.

Each citizen will be invited to answer five questions as follows:

Should Great Britain remain a member of the League of Nations?

Are you in favor of a general reduction of armaments by international agreement?

Are you in favor of general abolition of national air forces by international agreement?

Ought the manufacture and sale of armaments for private profit to be banned by international agreement?

If one nation is resolved to attack another, do you believe that the other powers ought to force that nation to renounce its designs, either by non-military economic measures, or, if needs be, by military measures?

The Daily Express some time ago conducted a straw vote, the outcome of which supported the newspaper's stand favoring a British isolationist policy.

The present semi-official referendum is intended to prove the contrary. Its backers contend that the results of the other vote were inconclusive because the questions were put in a very elementary fashion.

New Turkish Alphabet

Has Made Reading And Writing Simpler For People

Two million Turkish men and women have learned to read and write in the past five years. This is the result of the introduction of the new Turkish characters, derived from the Latin ones. Before the introduction of the new alphabet only about a million persons—less than one in ten—could read and write. The old Arabic hieroglyphics were very hard to understand and harder still to write, states Reuter. Mustafa Kemal Pasha, the Turkish President, was so keen on the language reform that he earned the nickname of "school-master-in-Chief" by giving lessons in the new script to Ministers and Deputies.

Ruler Was Marked Man

King Alexander Had Escaped Death On Many Occasions

King Alexander of Yugoslavia was one of the most shot-at monarchs in Europe.

In 1916 he narrowly escaped death when a man threw a bomb at him.

In 1920 he had a second narrow escape from a bomb at Sarajevo.

In 1921 another attempt was made on his life. This time one member of his entourage was killed and six wounded. The incident occurred at Belgrade.

In June, 1931, another bombing attempt was unsuccessful.

A year later—in May, 1932—the King's palace was bombed.

Canada supplied Malta in 1933 with over \$360,000 worth of goods, mostly wheat and flour. The imports from Malta to Canada for the same year totalled \$150.

No more RECHARGING OF BATTERIES!

... how would you like a battery radio that will do everything that the finest electric set will do? That will bring you the clear, full tone of the finest electric set ever made, day after day without weakening... and banish forever the annoyance and expense of recharging batteries? Then—hear the new Air-Cell Radio—the wonder of the air!

Air-Cell Radios are built and designed specially by all set manufacturers to operate with the EVEREADY Air-Cell "A" battery. A marvelous new "A" battery that re-energizes itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

But do not confuse the Air-Cell Radios built for the EVEREADY Air-Cell with any other battery set... Air-Cell Radios are entirely new from re-energized itself for at least 1000 hours, which at 3 hours a day is almost a year's service in the average household.

France Expresses Fear Of Danger From Enemy Aerial Warfare

Paris.—France's fear of danger from aerial warfare was intensified Sunday by disturbing events in Europe.

The funeral Saturday of the wartime president, Raymond Poincaré, revived the memories of the Great War while the London-to-McMourne air race reminded the French of their vulnerability from the air.

The whole problem of national defence has been taken up before parliamentary commissions with a discussion of the naval budget in the chamber of deputies finance commission. There, Naval Reporter Jacques Stern, gave a dark picture of the future by telling how the United States, Italy, Germany and Japan all proposed to enlarge their fleets.

Fears of a German air armada devastating France is hastening plans for defence.

Manoeuvres demonstrated recently that a fleet of bombers could invade France and spread much of Paris in ruins. Defence squadrons showed themselves almost helpless.

Germany is credited by some military experts with a plan for a sudden short air warfare that would send 400 or 500 big bombers over Paris, Lyon, Marseilles, the principal airports and armaments plants simultaneously.

New defences being sought by the French air force include:

1. Flying tanks.
2. Hundreds of tremendously fast pursuit planes.
3. New rapid-firers.
4. Aerial border patrols.
5. Protection of the population.

Winnipeg To London By Air

Western Flyers Vision Regular Schedule To Be Covered In 48 Hours

Winnipeg.—Winnipeg to London by air in less than 48 hours and on a regular schedule is the plan of a group of local flyers revealed here.

Roy Brown, Ted Stull, Milton Ashton and Jack Moar, four men prominent in flying in northern Canada who combine more than 25,000 hours of flying experience, are convinced of the feasibility of such a project and see in the "northern route" the base of a daily air service with the Old Country.

The route they have studied lies on almost a direct west to east line from Winnipeg to the Faroe Islands and then south to the northernmost tip of Scotland. It crosses Hudson Bay, Baffin Land, Greenland, and Iceland.

"This proposed service would not be a hit or miss affair," declared Mr. Moar. Air conditions, communication bases and type of equipment had all been closely studied, he continued, and he was convinced there would be a regular air service within two years.

Sunken Boat Raised

Montreal.—The British oil tanker Maplebranch, was raised to the surface of Montreal harbor after being submerged to her funnel for the months. She sank August 13 with her side ripped open by the propeller of H.M.S. Dragon. She will be repaired in drydock.

Council Of Women Ask For Full Investigation Of Trafficking In Arms

Ottawa.—The National Council of Women has called upon the Canadian government to take the initiative in proposing that "a full and untrammeled" investigation be now opened into the operations of British manufacturers and traffickers in arms. The investigation, it was expressly stated, should include any Canadian subsidiaries of these firms.

On motion of Mrs. A. C. Bagley, of Vancouver, seconded by Mrs. Walter Lyman, of Montreal, the council approved the following resolution sponsored by the Local Council of Women of New Westminster:

"That in view of the deadlock in the disarmament conference and of the alarming renewal of competition in armaments and the otherwise inexplicable recent increases in the demand for the raw materials of munitions, revealed by growing budgets for armaments and the extension of

war preparations everywhere, the Local Council of Women of New Westminster:

"Appeals to all men and women of goodwill to realize the danger and to join in practical measures for averting it.

"Recommends its conviction that the safety of the world demands an adequate control of the manufacture and traffic in arms and so far as is necessary the sale and supply of raw material, and

calls upon the Canadian government to take the initiative in proposing that, in view of the general concern in Canada over the charges made against the manufacturers and traffickers in arms as fomenters of war, charges in which British firms are involved, that a full and untrammeled investigation be now opened into the operations of these firms, including any Canadian subsidiaries that may be indicated."

For Better Films

National Council of Women Deplores Low Standards

Ottawa.—With the declaration that "low standards in the motion picture field have a direct relationship to juvenile delinquency and crime," the National Council of Women lined up in support of measures to clean up the pictures.

The council carried unanimously the following resolution:

"Realizing the powerful influence of the cinema in moulding and educating public opinion;

"Realizing too the fact low standards in the motion picture field have a direct relationship to juvenile delinquency and crime;

"The National Council of Women in annual meeting assembled, would therefore strongly urge all its federations, local, provincial and national, to lend their support to efforts being made at the present time to secure a production of pictures which would assist in character development and provide a medium of wholesome recreation."

A resolution which deplored "the increasing tendency of the Remembrance Day services in many parts of Canada to be a military pageant and a diplomatic ceremonial," evoked discussion but was referred to the convenor of the League of Nations committee so it may go to local councils for expression of their opinions thereon.

Sell Lands Too Cheap

Criticism Of Disposal Of Alberta Lands By Federal Government

Ottawa.—The Dominion government was criticized for disposing of Alberta farm land, either by giving it away to settlers or selling at \$3 per acre when as much as \$25 per acre was being realized on similar areas. M. M. Porter, counsel for Alberta, appearing before the natural resources commission, was arguing the claim of that province for compensation for alienation by the Dominion government of 25,000,000 acres of western land.

Mr. Porter quoted extensively from sales records between 1908 and 1930 to support his claim the lands could have been profitably disposed of.

A number of maps were filed in an attempt to show lands situated in closely-occupied areas, with land prices of from \$6 to \$25 prevailing, were by the act of 1908 either given away for nothing as homesteads, or sold at \$3 per acre as purchased homesteads or pre-emption.

The Holiday Spirit

Calgary.—Ninety-three workers in relief camps along the Lake Louise highway, 125 miles west of here, enjoyed a pleasant Thanksgiving day holiday in Calgary and two returned in a taxi cab. Others returned by train, bus and automobile. Officials of the relief commission did not take kindly to the holiday spirit, and orders have been issued the men must stay in the camps until they close for the season. More than 200 men, provincial charges, are employed at the camps.

Poultry Marketing Plan

Scheme For Selling Poultry And Eggs In Three Prairie Provinces

Ottawa.—Approval of the draft of a scheme for the marketing of poultry and eggs in the three prairie provinces under the Natural Products Marketing Act has been given by the Dominion marketing board, but it has not yet been submitted to the cabinet for final approval.

Providing for the licensing of all poultry producers in Manitoba, Saskatchewan and Alberta, and the licensing of all retail and urban retail merchants as well as wholesalers, the scheme would be operated by local provincial organizations already in existence bound together in the organization of the present Canadian poultry pool, the name of which would be changed to "Canadian Poultry Sales, Limited," with a Dominion charter.

The poultry co-operative would act as assembling agents. Sales would be made on a pool basis. It is proposed to utilize the present wholesale and retail organizations in order to avoid disturbance through the creation of new agencies.

Meetings of producers are now being organized in Western Canada, and before the scheme comes into effect it is proposed to get the approval of a majority of the producers.

Poultry co-operatives in Western Canada have achieved a measure of success and claim to have improved the standards of poultry products. They believe they can make further progress by utilizing the powers of the Marketing Act.

Having in mind the success of existing organizations, it is proposed the directors of the co-operative organizations in Saskatchewan and Manitoba be made local boards under the act. In Alberta the local board at first would consist of ten members drawn from existing poultry organizations and named by the minister of agriculture for Alberta. Later they would be elected by the registered producers. Within their provinces the local boards would control the product up to the point of having it assembled and ready for sale or shipment, when it would be taken over by the larger unit, Canadian Poultry Sales, limited. This body would consist of the nominees of the local boards, subject to the approval of the Dominion marketing board.

Garnet Wheat Standards

Tentative Grades Passed For Nos. 1 And 2 By Committee

Winnipeg.—Leaving Incorporated work to a sub-committee, the Western grain standards committee closed its two-day meeting. Tentative standards were passed for Nos. 1 and 2. Garnet wheat to give the inspection department a basis for grading. The sub-committee appointed will deal chiefly with the low grade grains, all other working having been completed during the meeting. The proposal for two grades of feed grain, because of variation in weight, was among the subjects given the sub-committee.

Ask Addition To Agenda

Vancouver.—British Columbia has suggested that the question of responsibility for unemployment be added to the agenda laid down by Prime Minister R. B. Bennett for the impending conference of premiers on possible constitutional amendments. Premier T. D. Pattullo stated.

HON. W. J. PATTERSON

Minister of Telephones in Saskatchewan, who announces that the Provincial Government has leased telephone circuits to interested parties for use for broadcasting, telephone communication or for telegraphic use.

Grain Smugglers Arrested

U.S. Farmers And Farm Laborers Have Admitted Guilt

Pargo, N.D.—Fourteen Towner county farmers and farm laborers, alleged by the government to have smuggled thousands of bushels of Canadian wheat into the United States and sold it, pleaded guilty in United States district court before Judge Andrew Miller.

Passing of sentence was deferred at the request of P. W. Lanier, United States district attorney, until the Grand Jurors term of court which opens Oct. 23.

Those in court were charged either with directly hauling the wheat to American markets or with conspiracy in connection with the delivering of the wheat to those who marketed it.

Arrest of Thomas C. Wildish, Ellsboro elevator man, alleged by the government to be one of the key figures in the smuggling, was announced a few hours before the 14 Towner residents appeared for arraignment.

Winnipeg.—Demand in the United States for soft grains for making macaroni was seen here as the cause of the smuggling of wheat from Canada across the international boundary into the United States.

Failed To Take Precautions

King Alexander Lost Life Because He Did Not Wear Bullet Proof Vest

Belgrade.—King Alexander of Yugoslavia lost his life because he did not wear his bullet-proof vest.

The king, assassinated last week in Marseilles, owned two bullet-proof vests. He had intended to wear one of them in France as he had done a month before on a visit to Bulgaria. But when he went ashore from the cruiser Dubrovnik at Marseilles, an admiral's uniform was his garb. The Associated Press learned he put on the bullet-proof vest, then found the admiral's uniform-tunic would not fit properly over the coat of mail.

He removed the vest at the last moment and went ashore with a perfectly fitting uniform but without the protection he had planned.

Makes Quick Recovery

Warsaw, Poland.—The paralysis which kept Peter Milewicz motionless for 30 years took a sudden turn for the better—too sudden for a couple of would-be robbers. When the robbers stalked into the paralytic's home in the village of Markieski, near Wilno, the invalid suddenly vaulted out of bed, grabbed a gun, and began to fire away at the startled marauders, who promptly fled.

PROMINENT IN FRENCH NEWS

Because of the fact that the French people believe the police were lax in not protecting King Alexander of Yugoslavia from assassination, Albert Sarraut, (left), French Minister of the Interior and head of the police force, has been forced to resign. It is also expected that Henri Charpentier, Minister of Justice, might be forced out of office due to his department's failure to satisfy the public in its conduct of the investigation into the Stavisky scandal.

Prime Minister Is Convinced There Is No Immediate War Danger

Alberta Resources

Royal Commissioners Consider What Sum Dominion Should Pay

Ottawa.—The royal commissioners considering what sum the Dominion should pay Alberta to even up accounts in the handing back of the natural resources to the province was given an outline of the credits claimed by the Dominion. Among other things the Dominion should be allowed credit for a portion of the cost of the Hudson Bay Railway, it was contended by J. MacGregor Stewart, of Halifax, who is one of the Dominion counsel.

The mention of the Hudson Bay Railway brought on an interesting discussion in which the three commissioners, Mr. Justice A. K. Dyar, Mr. Justice T. M. Tweedie, and George C. McDonald took part.

Mr. Stewart took the view the Dominion embarked on the Hudson Bay Railway because it held the natural resources of the three prairie provinces and planned to pay for it out of the money obtained from disposal of these resources.

Now that the Dominion had to account for all the monies it received from the sale of lands and other resources and reimburse the provinces, it should receive credits for obligations the administration of these resources brought upon it.

Commissioner Tweedie asked Mr. Stewart if the Dominion government had not borne the cost of developing other ports as national undertakings. With this admitted, Mr. Justice Tweedie suggested the cost of port developments in Nelson and later in Churchill might be considered a national obligation. About 38 per cent of the entire cost of the enterprise went into port developments.

Further it was claimed that the Dominion should be given credit for relief and seed grain given to farmers in Alberta while the natural resources were held by the Dominion. Mr. Stewart declared the relief was granted because the Dominion held these resources, and the farmers helped were settlers on Dominion land.

New Medicos

Westerners Pass Examinations Of Medical Council

Ottawa.—Successfully passing the examinations of the Medical Council of Canada, held at Montreal and Winnipeg early this month, 49 physicians, including three women, are now entitled to registration as practicing doctors. They may be licensed in any province in Canada.

Among successful Western candidates were: Robert Thomas Atkinson, Saskatoon; Paul G. Egnatoff, Saskatoon; William James Fowler, Cabri, Sask.; William Adrian Hargrave, Hodgeville, Sask.; John King Kelly, Regina; Donald Albert McMurray, Saskatoon; Maurice Hutcheon Moffatt, Bradwell, Sask.; Edgar William Pickard, Oxbow, Sask.; Ormond Murray Ranson, Abernethy, Sask.

John I. McFarland Expects To Retire From Post In About A Year

Winnipeg.—John I. McFarland, general manager of the central selling agency of the Canadian Wheat Pools, told a private gathering of delegates to the annual meeting of the Manitoba Wheat Pool he expected he would retire from his post in about a year.

Taking an optimistic viewpoint of world marketing problems, Mr. McFarland said his "job" should be over in a year and that he would then be able to turn complete pool management over to the elected pool representatives.

The wheat surplus was fast disappearing and the glut on the market was being eliminated, he said, in spite of the operations of Argentine, "the bad boy" of the London wheat agreement. Once this big problem is over, he said he could see no reason for remaining with the pool.

Premier John Bracken of Manitoba also addressed the gathering, taking part with Mr. McFarland in the "heart-to-heart" talk with the growers. The Manitoba government would

Quebec.—The all-absorbing questions in Canada of general elections, by-elections and political organization were pleasantly turned aside when before Prime Minister R. B. Bennett on his arrival here from six weeks spent in Geneva, Paris and London.

Out of touch with conditions at home, it was impossible for him to discuss these questions, Mr. Bennett said, but he was glad to discuss European affairs and he expressed the opinion there was no immediate danger of war arising from the Marcellus assassinations.

World peace on a firm and sound foundation was the essential preliminary to assured economic recovery, the prime minister declared. He was more convinced of this than when he left Canada six weeks ago. Some reassurance that this might be attained was to be gained, he said, from the evident determination among statesmen of the world that differences be composed without resort to arms.

His confidence in the Ottawa trade agreements had been renewed by contact with British statesmen and industrialists and he was more firmly convinced than ever that Canada could not have weathered the depression without them. The new treaty with France had been described by those in a position to express opinions as the best arrangement ever effected between the two countries.

With every appearance of good health and spirits, the prime minister was a prominent figure on the after deck of the Duchess of Richmond as the liner approached the dock at Wolf's Cove.

A large gathering of friends and supporters thronged the gangplank immediately it was lowered and the prime minister held an impromptu reception on board.

Regulate Livestock Selling

Dominion Marketing Board Has Matter Under Consideration

Ottawa.—Plans for regulating the marketing of livestock in Saskatchewan are before the Dominion Marketing Board. A scheme submitted by the Saskatchewan Livestock Producers, Limited, has been considered by the board and altered to conform to the terms of the Natural Products Marketing Act for approval.

Before taking definite action on the merits of the scheme, the board will receive representations from any person interested and before the scheme is brought into effect it will be submitted to the livestock producers of Saskatchewan for approval.

The Saskatchewan scheme is understood to be the forerunner of schemes for the provinces of Alberta and Manitoba now in course of preparation by representative producers in those provinces. All three will along the same general lines and will follow a plan which might be applied to the whole of Canada should producers in other provinces decide to co-operate.

NOTES AND COMMENTS

CITIES, towns, villages, reflect the type of people who live in them. Enterprise is reflected, or the lack of it, by external appearances. Collective effort means much to a community, and those who practice it show up in favorable contrast to those who are content to let things drift. You get what you go after. A chain is no stronger than its weakest link, and some communities are heavily handicapped by a lot of weak links.

"**TIN-HORN**" sports is a familiar term to gamblers. They are not confined to gambling circles, for business experience and newspaper offices see many evidences of this variety of "four-flusher." Publicity hounds will try and bleed a newspaper for free "puffs" and reports of their doings, but ne'er a cent do they cough up for advertising.

WHY can't this town have this and that, they querulously ask in comparing neighboring communities. The only answer is because there are too many barnacles who do not move a finger to help those who strive to make the place more than a tank town.

WE know business men who, recognizing that community leadership must be undertaken, give time and money, yet who are passed up when people have a chance to reciprocate. At times they are accused of trying to "feather their nests."

AS far as The Journal is concerned, it has labored under a handicap for several years in trying to publish a worth-while weekly newspaper on a small volume of advertising; but it is mighty thankful to those advertisers and subscribers who have loyally supported our efforts to give a faithful review of local activities. We know it is an asset to any community to have a properly printed local paper, otherwise we wouldn't be in the business.

BUT to those who try to make The Journal the "goat" while spending their money elsewhere we would point out that "business is business," and a fine line will be drawn in future in dealing with such unsportsmanlike people. We play the game, and expect others to do the same.

NOW that we have relieved ourselves of the "jitters," we'll turn to something more pleasant, and pay a tribute to those who have by word and deed made the town a better place in which to live. To name them would not be welcomed by the parties themselves, but we all know each other sufficiently well to size up individual qualities and

the part each has taken in community enterprise, for actions speak louder than brass bands and playing to the gallery.

THEY are the men whom The Journal will hand a bouquet to at any time, for they help to promote community life and by their actions create business for the sluggards as well as the more enterprising section of the populace. Never at any time in the newspaper game have we found it a bed of roses; but we have taken joy and pleasure in our work (and an occasional hard crack, too) and always tried to promote and encourage all efforts to increase social and business activity. And we haven't asked for a six-hour day either, for there is no occupation which demands so much persistent and detailed attention as running even a small weekly. A newspaper doesn't just happen.

WILL ROGERS, who has seen more of the world than most of us, and has just returned from encircling the globe, is not so hot for the Soviet system. He spent some time there, and this is what he says:

"**I'VE** been among the Russians. They've got a great idea over there. They divide everything up, but they didn't have anything to divide.

"**DON'T** let somebody come along and sell you on the communist stuff; that won't do. No working man of the 170,000,000 people owns an automobile. In 17 years, if they can't give something better than that, they can't peddle that idea to the old boys over here. The farmers won't come to town behind a mule any more.

"**THIS** country's always had more than they've had over in Europe. Our guys on the unemployment lists would be capitalists over there."—Cranbrook Courier.

THE ideal candidate is an impossibility. He has his virtues and faults, for he is human. Yet under our democratic system of nominations, any bally-hoo artist has a better chance than one with integrity and sounder principles, because many are influenced by emotion and not by logic. Organization of political adherents is necessary to select the best men from among prospective candidates, and election campaigners in the Pass towns should gather their scattered forces to decide on a plan of campaign.

FOUR wrestlers of good repute gave an exhibition on Monday. A hundred dollars was the total revenue, of which \$30 was required for hall and license, \$16.50 for printing and advertising, a slice of over 15 per cent. for provincial tax, leaving a deficit of \$16 for the promoter to pay. Such is the reward for trying to put Coleman on the sport map. Can you wonder that wrestlers or boxers

do not pummel each other very hard for such small returns?

THE question has been asked: "Why can't Coleman have the musical festival?" If a hardworking committee would get out and do the necessary work, so essential for success, the question would be easily answered.

Dan Morrison Buried in Drumheller Cemetery

DEATH claimed Daniel Morrison, 63 year old brother of Malcolm Morrison at the latter's home at Midlandvale on Oct. 15.

Born at Glace Bay, N.S., he became west 34 years ago and located in British Columbia, moving to Coleman in 1914. In addition to his brother, a sister, Mrs. D. McKiegan of Glace Bay survive him.

The funeral was held at Knox United church on Wednesday afternoon, Oct. 17, Rev. H. D. Leitch officiating, assisted by Capt. C. Watt of the Salvation Army. The following hymns were sung by the congregation: "The Lord's My Shepherd," "The Sands of Time are Sinking," and "Forever With the Lord." At the conclusion of the service, Mr. Gillender played "Dead March in Saul," which provided most impressive ending to the service.

Many beautiful floral tributes were offered by relatives and friends of the late Mr. Morrison.

Interment was made in Drumheller cemetery.—Drumheller Mail

Mr. Malcolm Morrison of Drumheller, and his sister, Mrs. McKiegan, of Glace Bay, N.S., were here during the week in connection with the estate of their brother, Dan Morrison.

This was Mrs. McKiegan's first visit to Coleman. Mr. Morrison is one of the pioneer residents, coming here in 1904 and at the time of leaving here in 1919 was a fire boss at International mine. He recently went to Kingston, Ontario, as a delegate to the Dominion assembly of the United church. He paid friendly visits to many old friends during his brief stay, and incidentally dropped in and renewed his subscription to The Journal, of which he has been a reader for many years.

O. E. S. Presentation to Mr. and Mrs. R. Evans

On Wednesday evening members of Minerva chapter O. E. S. gathered at the home of Mr. and Mrs. William Miller to present Mr. and Mrs. Robert Evans with a radio lamp on the eve of their departure to live in Calgary where Mr. Evans has purchased a retail business. Mr. J. Emmerich made the presentation, and complimentary addresses were made by Mrs. W. L. Rippon, worthy patron, and Mr. A. Cameron. The departing members organized the chapter in Coleman, having lived here 18 years and in Bellevue for four years, coming there from Blackburn, England. Whist was played, Mrs. Beveridge winning the prize, and the consolation by Mrs. S. Moore, the evening concluding with lunch served by the committee.

Joyce and Kwasnie Return

Jimmy Joyce and "Duke" Kwasnie returned home Monday morning after two weeks sojourn in Winnipeg attending the hockey school promoted by Lester Patrick. The boys report that Patrick showed them a number of points which they will endeavor to practise during the winter. Only two players were kept for further practice, Connolly of Moncton Hawks and Gardiner a goalkeeper.

Both Joyce and Kwasnie played in the exhibition games, being defence men on opposing teams. Joyce was successful in getting two assists.

Patrick advocated skating when ever possible, claiming all "hope fuls" should be fast skaters.

Father Dunbar and several of the church members are busily engaged in erecting a new fence around the church property this week.

Cultivate a personal interest in the store ads—for that will be merely an important way of safeguarding your purse from the little leaks that occur through unwise buying.

Pass Man Among Delegates, U. S. S. R.

Eleven Canadian Workers' delegates going to the Soviet Union on invitation of Russian Trade unions to study conditions in the country at first hand sailed from Montreal on Saturday. The delegates include T. Russell, F. C. Munroe, and Mac McKinnon, all of Vancouver; Thomas Mumford, Cranbrook, B.C. and Enoch Williams, Blainmore, Alta.

Navy League Does Valuable National Service

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine service, Coleman citizens subscribed \$21.50 to this cause in a recent campaign conducted by Fred Cooke organizer of the Alberta division. Further contributions may be sent to Fred Cooke, 1107, 15th Avenue West, Calgary, Alberta.

Anniversary Edition

The Macleod Gazette's 60th anniversary edition commemorating the arrival there of the original North-west Mounted Police, now the R. C. M. P., is a splendid historical record and also an example of enterprise on the part of the publisher. Intimate stories of old times, many of them still resident there, will be read with intense interest by many in Southern Alberta, and the anniversary number is another demonstration of the value of a good local weekly newspaper to a community. Congratulations are in order to Editor Jessup and the merchants and business men who co-operated with him in its production.

Mrs. J. Richards was hostess at a miscellaneous shower held at the home of Mrs. M. Joyce in honor of Mrs. Richard Bell last week. Whist was enjoyed by the thirty-two guests present, the prize winners being Mrs. Wm. Gate and Mrs. G. Higginbotham. Mrs. Bell was presented during the evening with a number of beautiful gifts for which she thanked the guests with a few appropriate words.

MISCELLANEOUS

Mrs. Harry Parkinson is patient in the local hospital this week.

Miss Maria Olson returned to Midnapore last Thursday after visiting here for several days with her sister, Mrs. Leslie Griffiths.

Patience may be a virtue, but at times it ceases to be, and even the most patient will at times rebel.

Robert Evans, for over 20 years employed at McGillivray mine as hoist engineer, is reported to have purchased a building business in Calgary, which he plans on taking over in November.

The Misses Gwen Brown and Megan Jones were hostesses at a miscellaneous shower held at the home of Mr. and Mrs. A. J. Brown last Friday in honor of Mrs. Loran Richards (nee Miss Eileen Cousins). Many original games and contests had been arranged for the evening, the contest winners being the Misses Margaret Allan, Winnifred Dunlop and Betty Thomas. A delicious lunch was served about 11:30, after which the bride was presented with a fancy decorated basket of useful presents.

ST. ALBAN'S CHURCH NOTES

Next Sunday, 29th of Trinity, Sunday school will be held at 12:30 p.m. and evening and sermon at 8 p.m. Mr. J. V. R. Wers of Fernie will be the preacher. All welcome.

A meeting of Anglican young people will be held in the church at 8 p.m.

ANNOUNCEMENT

Mr. Melville Anderson, of Anderson & McLean, sight specialists, Calgary, announces his next visit to G. R. Powell's, Coleman, on Thursday, November 1, 1934. 20 years' experience and regular visits assure you of satisfaction in all optical work.

FOR SALE—Coleman gas lamp, practically new—Apply Journal office.

A Moral in "Tugboat Annie"

The largest crowd to attend the Liberty Theatre at Amherstburg in years was present for the showing of "Tugboat Annie" on Friday evening, proving that if something good is offered the people of Amherstburg will want it the same as people of other communities. We do not know whether there was a moral in the picture or not, but there was certainly a lesson to be learned from the size of the crowd that attended it. A lesson that every business man in Amherstburg should learn—that a product, no matter what it is, as long as it is genuine and of good quality, can be sold. It was through the medium of Echo advertising that the people of the town and district learned that the show was on. They read the ad., came to the show, even though some had to stand in line to get their tickets, and got their money's worth. If a merchant has something to offer the public, whether it be pictures or pins, hats or hardware, shoes or ships, he must tell the people about it first. If it is good the people will buy it.—Amherstburg Echo.

James Allan Jr. is a patient in the Miner's hospital this week recovering from an appendix operation.

Registration of Voters For Coleman School District

New provisions of the Schools Act require that the wife, husband, father, mother, and every son and daughter of the full age of twenty-one years, who resides with the owner whose name appears on the assessment roll must register by October 31. Failure to do so will prevent your vote being recorded at the next election.

Tenants also must register who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August this year.

JAMES FORD, Secretary-Treasurer.

SUNDAY SCHOOL LESSON

OCTOBER 28

THE CHRISTIAN'S STANDARD OF LIFE

Golden text: "And be not drunken with wine, wherein is riot, but be filled with the Spirit." Ephesians 5:18.
Lesson: Ephesians 4:17-5:21.
Devotional reading: Colossians 3:12-17.

Explanations and Comments

The Old Man: the Unbelieving Gentiles, 4:17-19. In these verses Paul warns his readers against the life of non-Christians. His opening words, "This I say therefore and testify in the Lord," remind our of Christ's words, "Verily I say unto you," having the same solemn force as the latter, calling attention to the weightiness of the words that are to follow, to the importance of his readers' hearing and heeding. And the exhortation is, "that ye no longer walk as the Gentiles also walk." Paul is writing to Gentiles, and in these words there is an implied compliment for they separate his readers from the non-Christian Gentiles. But his readers are living in the midst of these non-Christians, and in danger of being influenced by their evil ways, and therefore Paul earnestly warns them against a relapse.

Do not live as they do, he urges; they are without intelligence, without God, their consciences are hardened into callousness, they have given themselves over to the grossest sensuality.

The New Man: Believing Gentiles, 4:20-24. Paul now tells his readers that, unlike the Gentiles of whom he had been speaking, they had learned the true teachings of Christ. "If so be that ye heard him," he says, "and taught in him" does not imply any doubt as to the fact. The clauses rather intimate that these Gentiles can be taken for granted. The word may be rendered, as it may be assumed that Christ was the teacher of the new man, and that the character of this instruction is further defined as being "even as truth as in Christ." In the historical Christ, the Jesus of Nazareth, are embodied the true standards of living virtues, the motives, the purity, the holiness, which his followers are expected to accept, to assume, to reproduce. The Christ of the Gospel is in the heart and in the way, and the truth, and the life." (Charles R. Erdman).

"Put away the old man," their old selves, with all the vanities and vices which had before they knew Christ, and being "renewed by the Spirit of their minds," must put on "the new man," the new selves, "that after God hath been seen in righteousness and holiness and truth."

Little Journeys in Science

COAL

(By Gordon H. Guest, M.A.)

A century ago, the great British statesman, Sir Robert Peel, said that the future belonged to the nation which could produce the most coal. Certainly the importance of coal cannot be over-estimated, and there is little doubt that the sudden curtailment of the world's coal supply would be an unbearable blow to our civilization. In transportation, manufacturing, and for heating it is widely used, and the production of those mighty tools of man, iron and steel, depend upon it.

Coal is known to the scientist as a carbonaceous mineral, because carbon is a fundamental part of its structure. Formed from the luxuriant vegetable growth of early geological ages, it is the product of the slow decomposition of these materials in a limited amount of oxygen. Geologists tell us that the conditions most favourable to its formation are found in fresh-water lakes bordered by flat, marshy land, on which an abundance of vegetation grows. The plants grow thickly, and grow again, pushing their way out into the lake and gradually building up on the bed a mass of peat, which is the first stage in the development of coal. Gradually the mass hardens first forming lignite or "brown" coal. As hundreds of thousands of years pass, the layers of peat are buried by masses of clay and sand which harden into rock, and which through the heat, pressure, and chemical action in the soil become first bituminous and then anthracite, or hard coal and steel, depend upon it.

No Undue Rush

During 1901 a Sanitary District in Chicago was sued by a construction company. Recently the case was finally wiped from the court docket because of the failure of the complainant to prosecute. At least it can be said that the court did not act hurriedly, or in a manner that in any way deprived the plaintiff of his civil rights.

For every 100 new automobiles that are sold to-day, about 167 used cars are sold.

The dog population of London is estimated at approximately 500,000.

Famous Geologist Dead

Sir Edgeworth David Blew Up Mes-sines Ridge In 1917

Sir Edgeworth David, the famous geologist, the first man to reach the south magnetic pole, died in Sydney (Australia), aged 76. He was born in Wales. Sir Edgeworth was scientific officer with the Shackleton expedition in 1907-9. In 1915, although 57, he went to France on active service as a sapper. He rose rapidly to the rank of lieutenant-colonel, becoming geologist to the British Armies on the Western Front. He it was who planned the blowing up of Mes-sines Ridge on June 7, 1917, thus preparing the way for the British advance. He made millions for Australia through his discovery of minerals.

Combats Invading Bombers

New Method Devised To Offer Protection Against Aerial Attacks

The "invisible smoke" barrier against invading bombers has been so successful that a squadron of fighting planes was forced to land during recent trials.

The engines of the planes were choked by the "metal dust" into which they flew.

This invention means that cities threatened with attack from the air may be protected—until some method of protecting the aircraft from the "invisible smoke" is discovered.

Since the invention of printing in the fourteenth century, nearly 800,000,000 volumes of the Bible have been printed.

To Make Whitewash Glossy

A whitewash can be made glossy like paint by dissolving a pound of cheap bar soap in a gallon of water and adding to it five gallons of thick whitewash mixture. Lime can be made more soluble and will penetrate further into the wood by adding a pint of molasses to every five gallons of whitewash.

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Werner's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they know it's the best! Costs but little—any drugstore.

TELL YOU HOW TO COOK
3 VEGETABLES AT ONCE
IN THE SAME SAUCEPAN

with no odor... less cost... better results

Place each in its own bag made from Canapar Cookery Parchment. You seal in all the mineral salts and flavor, this way... and there's no odor, not even from cabbage or cauliflower. You need only use ONE burner—turned low.

And vegetables are only one food that can be cooked better with Canapar. For instance, when boiling or steaming fish, all the goodness and flavor are retained—and there's no odor—no sticky pots and pans to scour. This alone makes Canapar worth using.

Remember that Canapar won't absorb odors. You rinse it off—hang it up to dry and use it repeatedly. Try it as a dish cloth, especially for glasses—it does not shed lint.

THE TENDERFOOT

By
GEORGE B. RODNEYAuthor of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been avastematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

But Keene decided to see what was happening for himself—not as Gerald Keene, half owner of the Hour-Glass Ranch, but as Duro Stone, tenderfoot in a Montgomery Ward westward outfit.

Dad Kane, desert rat and luckless prospector till now, is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and prospector's revenge!

Joe Carr's daughter, Edith, repulses Dustin when he wished to make her acquaintance, saying when she walked with a man, it would not be with a squaw man. He plans revenge, but has had no opportunity so far. Affairs on the ranch going from bad to worse, Joe Carr takes to drink.

(Now Go On With The Story)

CHAPTER III—Continued

Somehow the Broken Spur always found a market. Broken Spur cattle were shipped periodically to California to be fattened to bring the highest prices in a falling market while the Hour-glass could not pay its freight bills for such shipments. Poor old Joe Carr saw the Hour-glass go to pieces under his able hands and he sought in vain for the reason. That suit over Soda Springs was the last straw.

"I know damned well they've been robbing us deaf, dumb and blind," he snapped to Bud Crewe, his foreman. "But I can't prove it. What can I do? There's nothing I can do, Frank."

"Huh. You might try leavin' the cork in that whisky bottle for a change," said Crewe, who was not inapparently named Frank. Carr cursed him and on that occasion left the cork in the bottle . . . for an hour.

"I wish to God I could get track of that young fellow Gerald Keene," went on Carr fretfully. "You know how old Peter Vinton left the Hour-glass. Half to me and half to him and if one of us dies, the other gets the half of the one who dies. Funny way to leave a ranch. Nobody can find young Keene. Nobody knows his address. Two brothers runnin' the red ink right along by borrowin' cash to finance the Hour-glass for the last few years. I've been dolin' it on my own responsibility. It ain't right that he shouldn't pay his share."

"I mean he's got to pay his share," wheeled on his employer. "I've known you for a lifetime as men count years. As a cattle-man nobody can teach you a thing about the business. As a distiller you ain't much but as a steady consumer of bottled goods you ought to have a gold medal. No use blakin' facts that're right face up on the table. It's liquor that's helped put the ranch in the red. . . . Red liquor. It might have happened anyhow but I know it helped a bad matter to git worse. It's time somebody tellin' you."

Carr began a futile protest but Crewe cut him short.

"You'd never have got into that card game in the Silver Dollar but for red liquor. That game cost you ten thousand and you know it. You'd never have tried runnin' a horse for the Cosubula Sweetwater if you hadn't been so full you couldn't hit the ground with your hat. Then you made a bet you'd win it and when you sobered up you wouldn't even hedge. A cattleman's got no business runnin' a horse except at the end of his rope. You know it when you're sober, Lou. That's what makes me so damned hot."

"I was tryin' to win back what I'd lost," said Carr.

"Hei, man! I know that. A fat chance you had of winnin'! Three stars settin' in the game an' you with the only roll in town with Spike Goddard sittin' in the game and a bar mirror behind you that you never even saw till too late. Man, you were askin' for trouble."

"Well, I got it all right at that. Listen here, Frank. Is there any way I can locate this man Gerald Keene? Can't you think of some way?"

"Simon Burwell of the Drovers Bank in Cato handled the ranch's business didn't he? Better write to him. What's the trouble, Joe?"

"Money," said Carr hoarsely. "I need money, Frank, and that's a fact."

"Can't you borrow enough at the Seco bank to tide you over? Old Pegram, the president there, ought to help you."

"Hei, man! It's old Ichouse Pegram I want to pay. They're yellin' over some back interest that I haven't been able to pay. I borrowed eleven thousand from Pegram on my personal note and I haven't been able to pay him the interest. It's about eleven hundred odd . . ."

Now... new aid in PREVENTING Colds

Remarkable New Formula is Especially Designed for Nose and Upper Throat where most colds start

AFTER years of research on the problem of colds, Vicks Chemists have developed a remarkable new preparation—Vicks Vapo-Nol. This exclusive Vicks formula is especially designed to aid the functions which Nature has provided—in the nose—to prevent colds, or to throw them off in their early stages. Used at the very first feeling of nasal irritation—just a few drops up each nostril—Vapo-Nol helps to avoid many colds altogether.

Relieves Head Colds at Every Stage

If irritation has reached the stuffy, sneezy stage—Nature's usual warning that a cold is developing—prompt use of Vapo-Nol helps to throw it off in the early stages.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Vapo-Nol penetrates deep into the nasal passages—reduces swollen membranes—clears away clogging mucus—brings welcome relief.

Vapo-Nol is real medication—not mere "oil drops"—yet is absolutely safe for children and adults. It has been clinically tested by physicians—approved by specialists.

Easy to use, anytime or place—at home or at work. Keep a bottle always handy.

Introduces Vicks Colds-Control Plan

This new aid in preventing colds is the ideal companion to Vicks VapoRub (modern external treatment for colds). Together with certain simple rules of health, these two preparations form the new Vicks Plan for Better Control of Colds. Records of thousands of clinical tests—made over a period of two years, and under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds. (Full details of the Plan in each package of Vicks VapoRub and Vicks Vapo-Nol.)

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel tired a lot more. 'Weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of liquid.

PHILLIPS' Milk of Magnesia

back on us . . . You . . . Why not talk with Dustin over the matter?"

"Over an ivory front sight," snarled Carr. "That's the only way I'll talk to him. See if you can't find out where I can get in touch with Gerald Keene. He owns half the ranch. He might help."

But all attempts to find Gerald Keene had failed and at times old Joe doubted whether such a person really existed.

"I don't know what to make of it," growled Crewe, tramping the floor. "The man has just dropped out of sight. Nobody knows where he is or even where he used to live."

"And to-day I was notified that old Pegram wants some definite action taken on my note," said Carr. "That means pay. How in hell can I?"

Crewe whistled again.

"It looks like they've got you by the short hairs," he growled. "If they crowd you, what'll you do?"

"Good God! What can I do?" demanded Carr miserably. "He remembered old days when a mere verbal assurance that he would pay would have satisfied the bank but Pegram knew nothing of those days. 'I'm too old to start all over again,' he said wretchedly. 'I can't do it, Frank. To there's Edith to be thought of.'"

There had always been Edith and old Joe Carr had never ceased to think of her though his thoughts were not always sober ones. Crewe could not help reflecting sadly that a few hours of thought about Edith at the proper time would have prevented much of the present trouble. But he only said:

"There seems to be only the off chance that we may find this man Gerald Keene. Still . . . Even then I bet too sure he'd help much. You can hardly expect a man to shoulder half the debts you've incurred on your own sole responsibility. Men don't buy dead horses as a rule."

"Huh. His uncle Peter Vinton would have done it." . . . Carr was desperate. "Peter and me was partners when it meant somethin' to back a man's play. There ain't much hope, even if we find this man Gerald Keene, that he could or would help much but as far as I can see, Frank, it's our only chance. If we can find him, he might be willing to help us out for the full ownership of the Hour-glass. What do you think?"

"Looks to me like you're about right," said Crewe. "Our best hope is to find Gerald Keene."

CHAPTER IV.

"I'm still a-waitin' to hear you tell me how you plan to bring that head-colded girl of Joe Carr's to heel."

Spike Goddard poured himself a generous drink and eyed Dustin quizzically across his glass. Dustin continued to stare at him. Words finally came.

"There's a lot more than any girl in this now. You poor fool! Can't you see as far as the end of your

nose? Don't you see the mess we're in? Dad Kane knows enough of what Corse and Gray were doin' up in the hills to put you and me both behind the bars for ten years. . . ."

(To Be Continued)

For the first eight months of 1934, the shipments of livestock from Western to Eastern Canada, namely 59,752 cattle; 636 calves and 45,222 sheep, showed increases in comparison with 1933 of 17,924 cattle, 428 calves and 10,739 sheep. Hogs which totalled 145,123, showed a decrease of 66,809.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile
Without Calomel

You are "feeling punk" simply because your liver isn't pouring its daily two pounds of liquid bile into your bowels. Irrigation and stimulation are both hampered, and your entire system is being poisoned.

What you need is a liver stimulant. Something that goes further than mild, mineral water, oil, laxative candy or chewing gum or roughage which only more the bowels—aggravating the bad case of trouble, your liver.

Take Carter's Little Liver Pills. Purely vegetable. No harsh salines (mercury). Bile. Bile. Ask for them by name. Tasteless stimulation. 25c at all druggists.

Canadian flour imported into Hongkong during the first six months of 1934 showed a considerable increase over the figure recorded for the corresponding period of 1933.

Few Minutes Eases Neuritis Pains Now!

DISCOVERY BRINGING QUICK RELIEF
FROM PAIN TO MILLIONS

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain

practically as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get lots of 12 tablets or economical bottles of 24 or 100 at any druggist's.

IN 2 SECONDS BY STOP WATCH
An Aspirin tablet starts to disintegrate and go to work.

What happens in these pictures? Aspirin starts "taking hold" of pain a few minutes after taking.

When in Pain Remember These Pictures
